## Re-Evaluating Digital Technology to Enhance Learning 2018 – 2020 (2021) KA2

Volkshochschule ARBERLAND

Germany

## What is the aim of the project?

- Examine the effectiveness of the use of digital technologies. Not only a self evaluation of our digital maturity but also our response to the learning needs of students.
- In many cases digital technology has been used to substitute the existing teaching tools. While there is nothing wrong with this as such it demotes digital technology's role in education to one of substitution for existing technology.
- As educationalists we should be asking ourselves if we can get more from digital technology. How can digital technology be employed in a more productive way to enhance vocational learning.
- In fact how can we harness the full potential of digital technology so that our students gain the maximum vocational educational benefit from its use.

# Partners in the Project

- ▶ vhs ARBERLAND, Regen, Germany  
Adult Education Center
- ▶ Cork Education and Training Board, Cork, Ireland;  
College  
**Coordinator**
- ▶ Haapsalu Kutsehariduskeskus, Uuemõisa, Estonia  
Educational centre – Vocational Training (secondary level)
- ▶ Inspectoratul Scolar Judetean, Bacau, Romania  
School Inspectorate
- ▶ IES Ribera del Tajo, Talavera de la Reina, Spain  
Educational centre – Vocational Training (secondary level)
- ▶ Hasan Fatma Onal Anadolu Lisesi, Kusadasi Turkey  
High School

# Benefit of the Project

- The critical question we wish to answer is, how can we use that technology more effectively?
- Critical examination of how digital technology is currently being used in vocational education
- Give participating teachers the opportunity to examine in detail how they currently use digital technology in vocational education, question whether this use is educationally sound and work to develop a better strategy for digital technology use to enhance student learning
- Investigate how students with difficulty can be helped by using digital technology to deliver course material targeted towards their stronger learning type

# How much effort is the project?

- 5 Short Term Staff and Students Training Events
- 3 Management Meetings
- Project website
- Preparing meetings/ presentations
- Prepare sample vocational lessons
- Evaluation

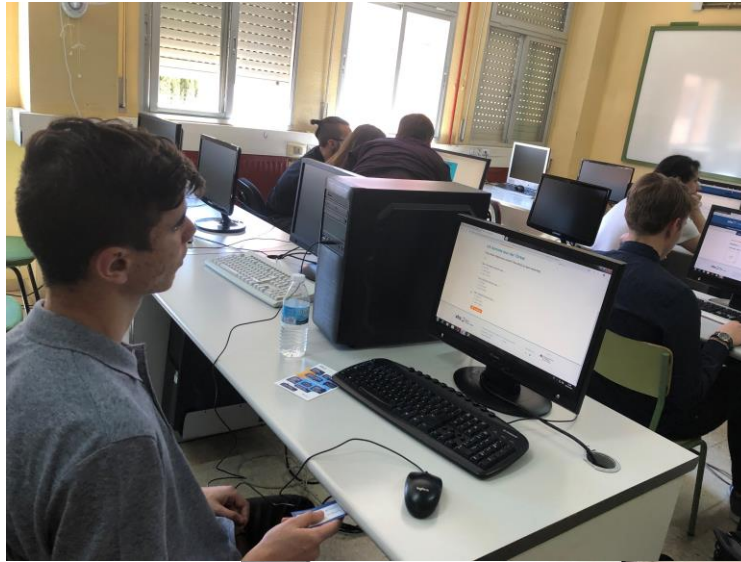

# Short Term Staff and Students Training Event in Talavera

Spain

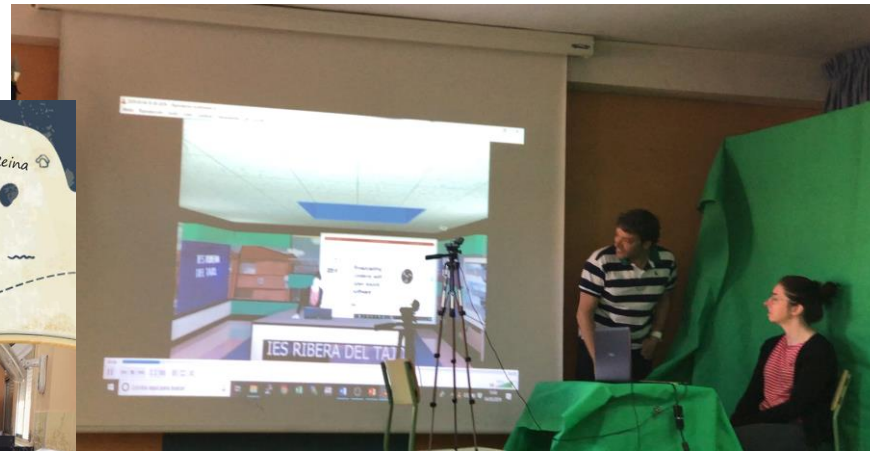

29.04.2019 – 05.05.2019

Examining how students learn with the goal of developing a better strategy for the use of digital technology in vocational education.

# Lernportal

# Teacher Training Event in Haapsalu

Estonia

24.11.2019 – 30.11.2019

Examination of the use of digital technology  
as a vocational training support
